

ENHANCED DATA MANAGEMENT TECHNIQUES FOR REAL TIME LOGISTICS PLANNING AND SCHEDULING

LOGISTAR (“Enhanced data management techniques for real time logistics planning and scheduling”) is a EU research project funded by the European Commission under the Horizon 2020 programme, which was launched in June 2018. It will last for three years, until June 2021.

LOGISTAR is aimed at allowing effective planning and optimizing of transport operations in the supply chain by taking advantage of horizontal collaboration relying on the increasingly real-time data gathered from the interconnected environment.

For this, a real-time decision-making tool and a real-time visualization tool of freight transport will be developed, with the purpose of delivering information and services to the various agents involved in the logistic supply chain, i.e. freight transport operators, their clients, industries and other stakeholders such as warehouse or infrastructure managers.

VENETO INTERMODAL
[2018-IT-TM-0057-5]

7 May 2019
Kick off meeting
Confindustria Verona, Piazza Cittadella 12 - Verona

The Workshop is focused on intermodal transport at regional level within the framework of the Transport Master Plan of the Veneto Region, with particular reference to its freight and logistics section. The action as a whole aims at strengthening the so-called "last mile" connections of regional infrastructures of EU interest. The four project partners will present their planned activities and then some operators will discuss about the regional outlooks.

9.00	Registration of participants and Welcome coffee
9.30	Introduction Michele BAULLI, President, Confindustria Verona Matteo GASPARATO, President, Consorzio ZAI Quadrante Europa Verona
9.50	Veneto Intermodal Project in the EU Framework Gulim OCAKODGLU, Deputy Head of Unit D1, Maritime Transport and Logistics, DIG MOVE Juste ZVERBYLTYE, Project Officer, INEA
